

SWISH coatings

A ROOF SHIELD RANGE OF PRODUCT

BHUMIKA

FLOOR AND ROOF TILE COATING

HIGHLIGHTS

WITH IMPORTED CHEMICALS

CROSS LINKED ACRYLIC POLYMER BASED

LASTS LONG

SELF LEVELING COATING

WATER BASED COATING

COVERAGE ABOVE 75sq.ft. WITH 1kg PER COAT
(DEPENDING UPON THE SURFACE CONDITION)

AREAS OF APPLICATION

BUILDING FLOOR & ROOF TILES

-CEMENTITIOUS, CERAMIC AS WELL AS CLAY TILES.

ADVANTAGES

*HIGHLY ABRASION RESISTIVE

*CAN BE TINTED IN ANY COLOURS

*ECO FRIENDLY

*UV RESISTANT

*PEELING OFF RESISTIVE

*FUNGAL RESISTIVE

*SOLVENT FREE

*HIGHLY WATER REPELLENT COMPOUND

BHUMIKA, an innovative, Water based, Abrasion Resistive, Water Proof coating formulated by us after thorough research and field testing. BHUMIKA acts as water proof shield. The active chemical components (mostly imported from Germany & USA) in BHUMIKA yield a highly abrasion resistive, flexible, water proof coating and it thus extends the life of Floor & Roof Tiles considerably.

BHUMIKA is a mixture of high grade cross-linked polymers, imported inhibitors, admixtures and specially graded and selected additives.

It dries very fast by evaporation to yield a tough, flexible, non yellowing abrasion resistive and water repellent surface. It can be applied on all types of Cementitious, Ceramic as well as Clay tiled surfaces (Floors & Roofs). Being water based, no need of expensive thinners for dilution or cleaning of hands and brush etc. It is Eco friendly and lasts for years.

ADVANCED CROSS LINKED POLYMER BASED
WITH IMPORTED CHEMICALS

WATER BASED COATING
FOR ALL TYPES OF FLOORS

Manufactured By
Swish Coatings,
543,Krishna Nagar,
Arumuga Goundanur, Perur,
